

DPA Activities Handout

The DPA (Daily Physical Activity) Initiative in Alberta aims at having all students in grades 1-9 participating in at least 30 minutes of physical activity per day.

DPA Activities Handout

Warm-Up/Fitness:	Warm-Up/Fitness:
Skills Focus:	Skills Focus:
Learning Activities/Games:	Learning Activities/Games:
Closure/Cool Down:	Closure/Cool Down:

Ice Feet

Equipment: None required

Organization: Traditional Inuk game that was originally played as a way to keep their feet warm while spending long hours on the ice.. Find a partner and link arms with your partner. Once you have a partner, when the the teacher say, “go” your goal is to tag your partner's feet without your feet being stepped on using your feet only. Once one of your feet are tagged the tagger receives one point. Once one partner gets three tags switch partners and find someone new to continue the activity.

Variation: Play activity in an alternative environment (outdoors, snow/ice, etc.)

Fitness Dice Activity

Equipment: Obstacle-free space, foam dice (one for each pair or group of three), chart paper w/ 6 activities on it representing the 6 sides of the die.

Organization: Organize participants into groups of 2-3. On the signal (ie. music playing), participants toss a die back and forth. When the music stops, whoever is holding the die calls out the number that his/her thumb is on. The pair or group of three then looks at the board or chart paper and performs the activity that represents that number and answer the questions relating to that number.

Dice activities include:

1. 8 squat jumps
2. 8 wall push-ups
3. 10 side to side hops
4. Crab walk to the other side of the room and back
5. Side to side skier jumps
6. V-sit for 20 seconds

Variation: This activity can be turned into a ‘*Fitness Dice Routine*’ performed by the entire group! Have the participants stand in a large circle or two smaller circles and have them pass the dice across the circle to one another. Play music while participants are passing and be sure that they communicate to whom they are passing to beforehand. When the music stops, ask one participant who is holding onto a die to indicate where his/her thumb is. The entire group then performs the activity that corresponds to the chart. Work your way around the circle to the others holding onto the dice to complete the Fitness Routine.

Five Finger Fling:

Equipment: None required (*Playing cards/chart paper optional*)

DPA Activities Handout

Organization: Divide students into groups of 4-6 participants with each of the groups standing in a circle with their backs towards the middle. The goal of this activity is to have the group's fingers add up to a previously specified number. Set a number for each group to attempt to have their fingers add up to and make sure the participants don't talk to each other to plan who is going to show what number of fingers. Each participant uses one hand to hold out as many fingers as they want (0 to 5). With everyone facing outwards of the circle, participants jump to face the inside and "fling" out however many fingers they choose. To make this more physically active, instead of jumping to face the middle, have the students count to 3 while doing a jumping jack (ex: one- jump so feet are wide apart; "two"- jump to get feet back together; "three"- jump feet wide apart again), then jump and turn to face the inside of the circle with your fingers displayed.

If they don't get the right number, have them repeat the activity until they do. Once each group achieves the correct sum of fingers, assign them another number to keep them playing. Participants could think of their own creative activities to do while counting "1..2..3"; i.e. reach up...touch toes...reach up...turn towards centre. Also, consider having a list of activities that the groups could work through instead of just performing jumping jacks. The list could include the following:

- Squats
- Star Jumps
- Lunges
- March on the spot

Variation/Inclusion: Provide a deck of cards and post a chart indicating the symbol of the card and activity that represents that symbol, i.e., Spade = squats, Diamond = duck walk, Hearts = High Knees, Club = curl-ups. The number on the card represents the number that the group must try to add up to on the finger fling.

Treasure Island

Equipment: Obstacle-free space, 1 poly-spot per group of 4-6, 40-60 bean bags (more than 1 bean bag per person, the more the better!)

Organization: Divide the students into groups of 4-6. Give each group a poly-spot, this will be their "island." Invite them to set up their island anywhere in the "ocean" (play space). Spread the bean bags throughout the ocean. Explain that the beanbags are sunken treasure and they are trying to retrieve as much treasure and return it to their island in the time given. To move the treasure from the ocean to their island, they must place it on their stomach and crabwalk back their island. If the treasure falls off while they are transporting it back, they must leave it and retrieve a different piece of treasure before they can go back to the treasure that fell off.

Variation: Allow students to steal treasure from other islands.
